

The NAB is upset that the american people has used its right to pay For a service, they are upset that we would rather pay for a service that we want, and be able to hear it when we want, then set thought hours of endless crap, rather it be commericals that I don't want to hear or some stupid dj talking about something i don't to hear either. XM provides what I want when I want it. I have the right to pay for that and that is what i am doing. If the NAB wants to do something about about this then need to improve there service, the people of the XM nation have spoke, we are tired of the crap the NAB members have been forcing down our throats for years. Times have changed, they need to change with the times.
